Edit Photo

Display

Back

If the photo name or caption textfield is empty and add photo is pressed

Error

The photo name or caption field is empty

OK

Success

Successfully added photo to Album: albumName
photo: photoName

Ok

If a photo is not selected in the photo list

Success

Successfully removed photo from Album: albumName
photo: photoName

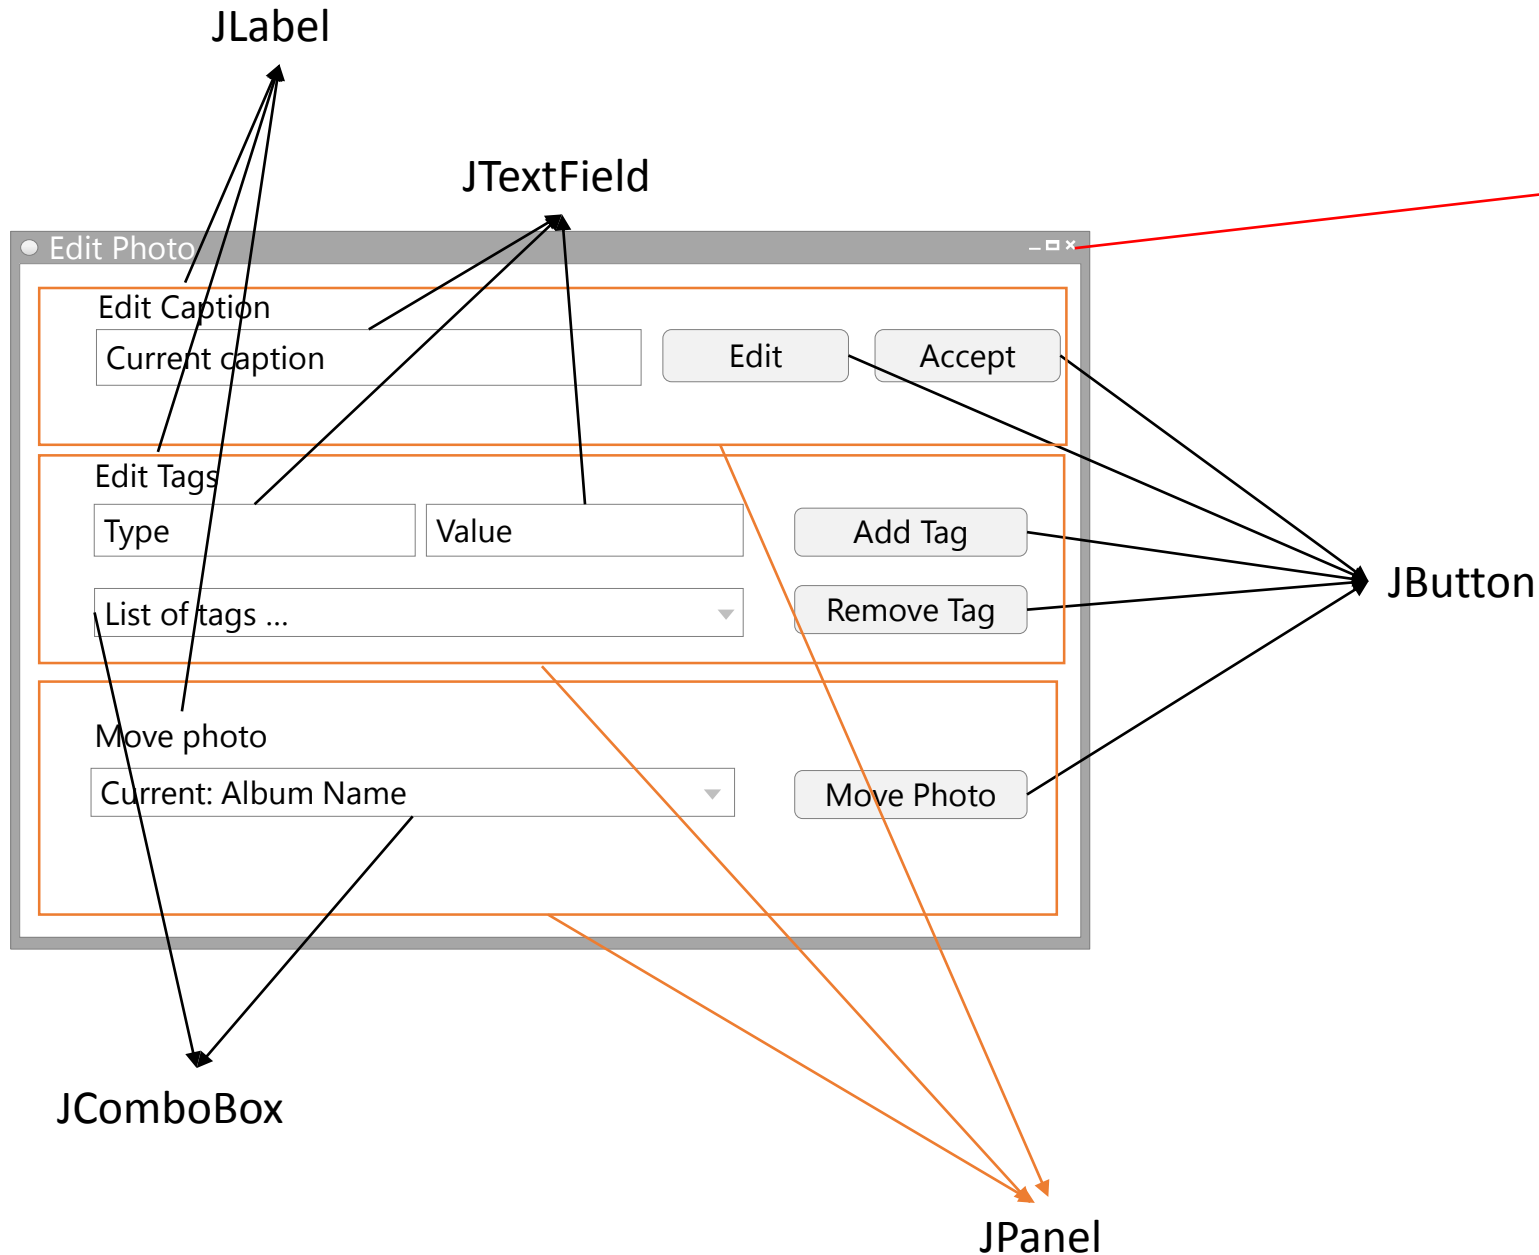

Ok

Error

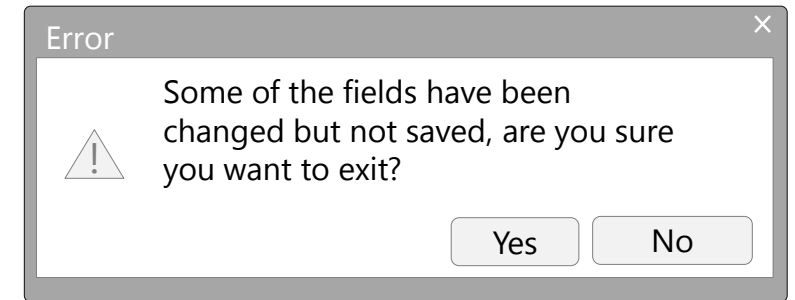

Select photo from the list first!

OK

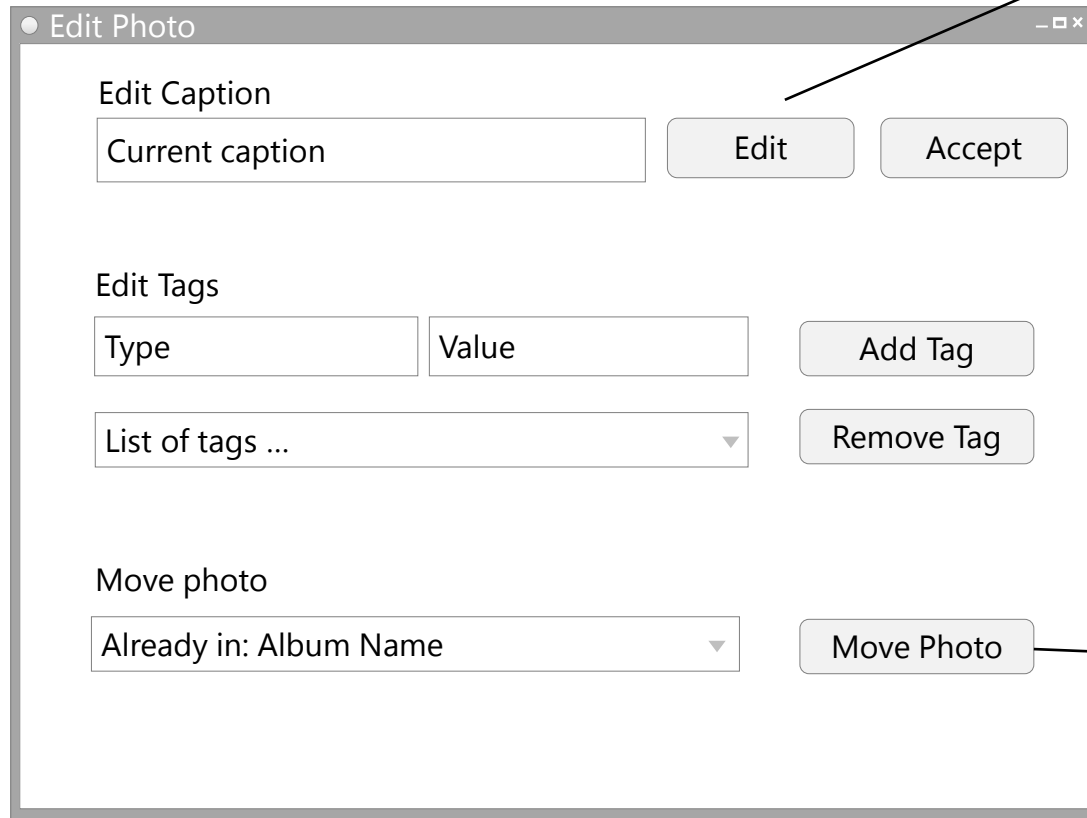

Edit Photo Screen

- Pressing the X button will return to the Album with list of photos
- On exit, if any fields were changed a dialogue box will ask the user for confirmation of exit
- The changes typed into text fields will be discarded.
- The selected album in the move album will be reset to the current album

Edit Caption / Move Photo

The 'Edit Photo' dialog box contains three sections: 'Edit Caption', 'Edit Tags', and 'Move photo'. The 'Edit Caption' section has a text field labeled 'Current caption' and two buttons, 'Edit' and 'Accept'. An arrow points from the 'Edit' button to a list of bullet points. The 'Edit Tags' section has two input fields, 'Type' and 'Value', an 'Add Tag' button, a 'List of tags ...' dropdown menu, and a 'Remove Tag' button. The 'Move photo' section has a dropdown menu labeled 'Already in: Album Name' and a 'Move Photo' button. An arrow points from the 'Move Photo' button to a text box containing conditional logic and a success message.

● Edit Photo

Edit Caption

Current caption

Edit Accept

Edit Tags

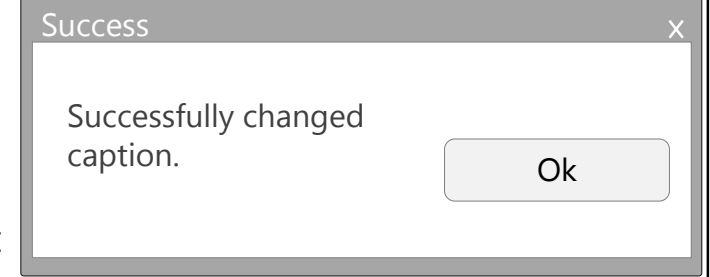

Type Value Add Tag

List of tags ... Remove Tag

Move photo

Already in: Album Name Move Photo

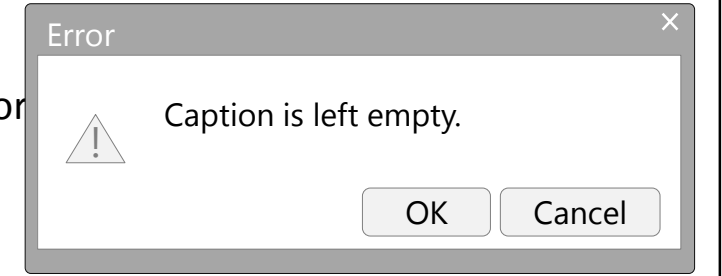

- The current caption displayed in the text field and is immutable.
- Edit will allow the user to change the caption in the text field
- Accept changes the caption,
- If text field is left empty - error dialogue
- The caption field becomes immutable again.

Success

Successfully changed caption.

Ok

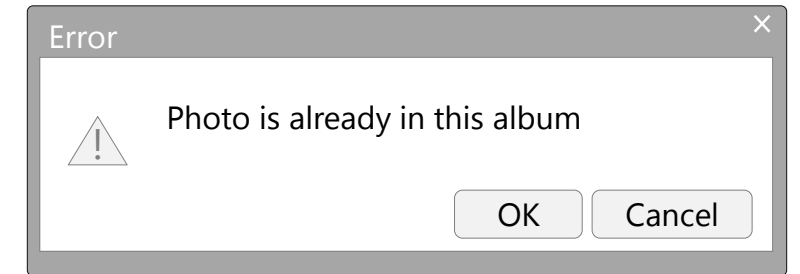

Error

! Caption is left empty.

OK Cancel

If the chosen album already contains the photo

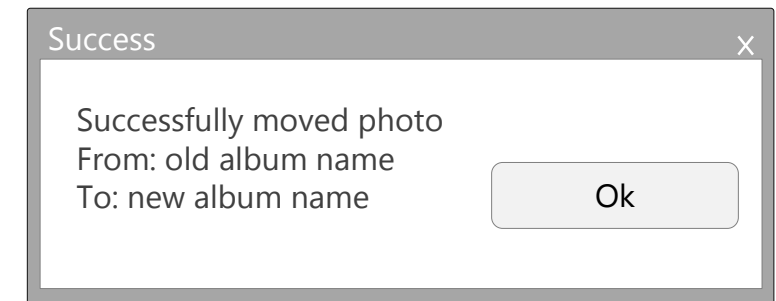

Error

! Photo is already in this album

OK Cancel

Combo box contains all the albums for the user, if the photo is already in the album – it is marked as “Already in: albumName”

Otherwise

Success

Successfully moved photo
From: old album name
To: new album name

Ok

Edit Tags

● Edit Photo

Edit Caption

Current caption

Edit Tags

Type Value

List of tags ...

Move photo

Current: Album Name

If the tag already exists for the photo

Error

 The specified tag is already belongs to this photo.

If the type or value fields are empty

Error

 Please specify the type and value of the tag.

Otherwise confirm success

Success

Successfully added tag to the photo

Caption field resets to the current caption

Since if the tag is in the combo box already it has to exist, so remove should go off without a hitch.

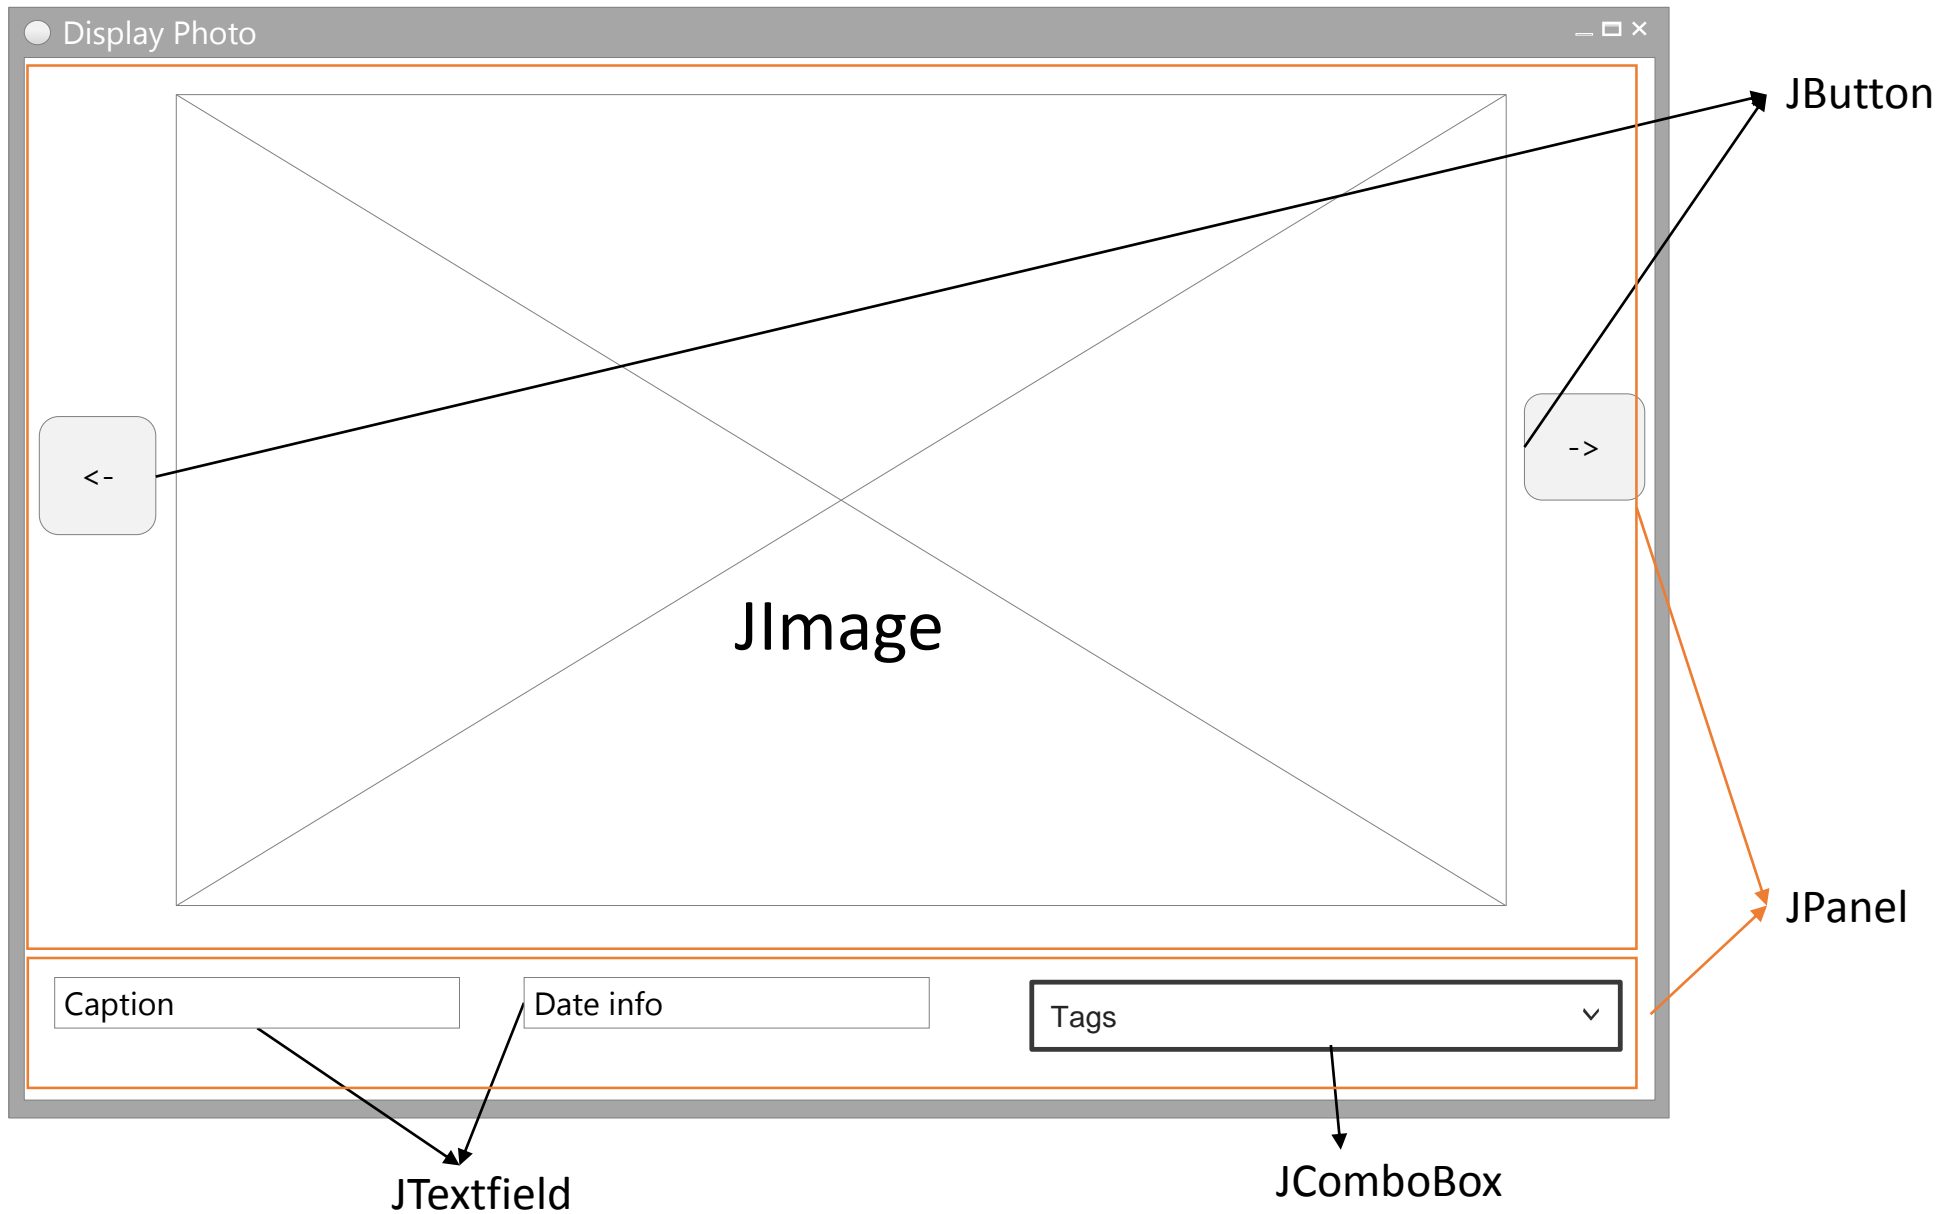

Confirm success

Type and value Fields reset to the values of "type" and "value"

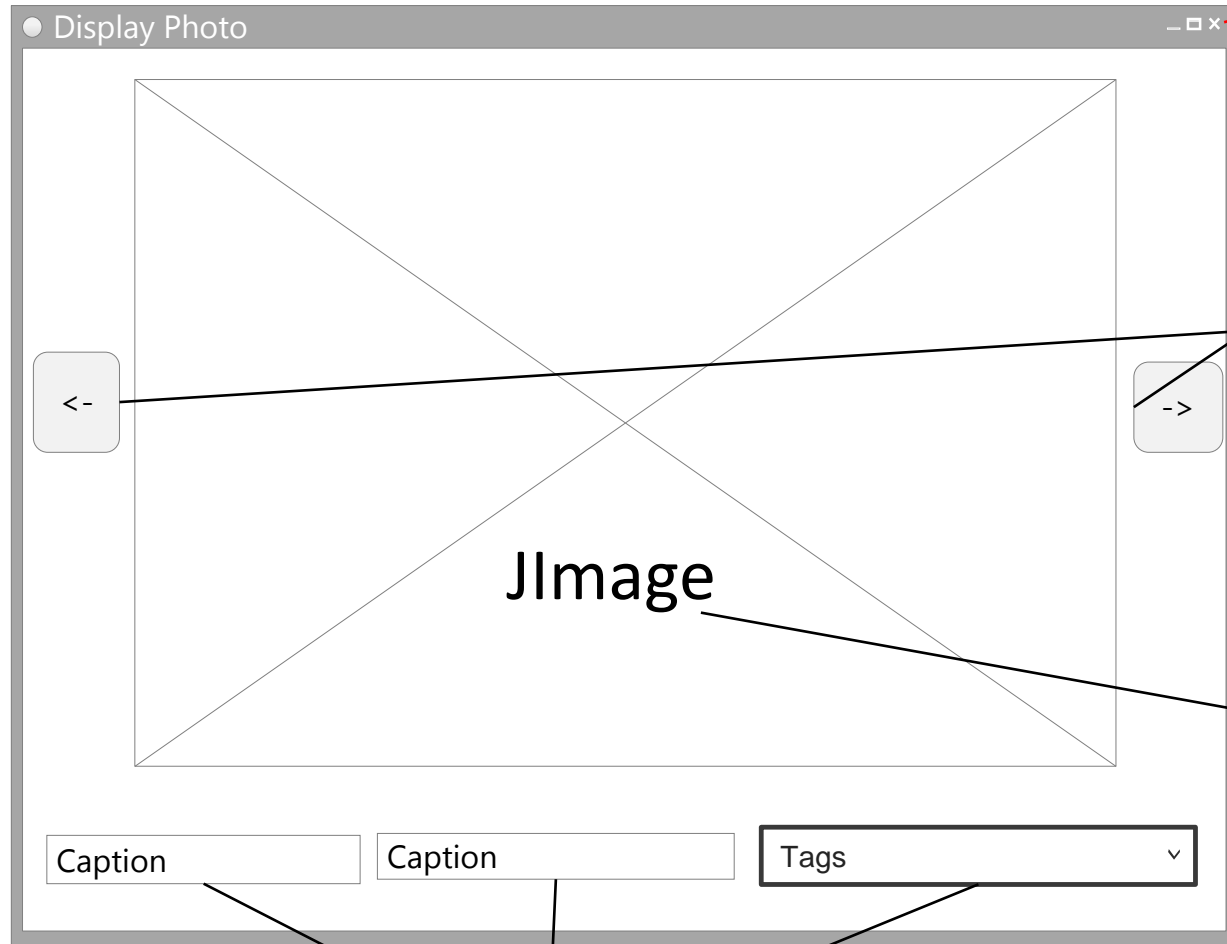

Success

Successfully removed tag from the photo

Display window

Display window functions

Pressing X will move close the display window and move back to the open album.
No confirmation prompt here, as no information is being changed.

The buttons here are for moving through the photos in album in sequence.
Left button is backwards.
Right button is forwards.

If the user is at the end of the album
The right button is turned off.
If the user in the beginning of the album the left button is turned off

The JImage area is for displaying the image selected on the Photo List screen.

All 3 are unable to be edited, all data here is purely for display purposes. The reason tags is in combo box is to save space and still have a neat and concise way to display all tags.
